

Distribution Frame Accessories

2357-1
Vertical Mounting Bracket

Mounting Bars

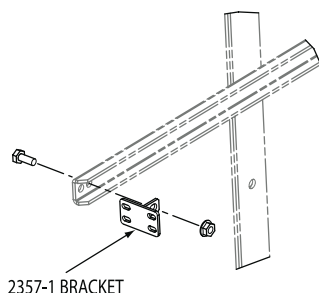

Connector mounting bars are required on conventional and universal-type distributing frames to support central office connectors on the vertical side. They are zinc plated and dichromate dipped to assure a low resistance connection to ground the connector assembly.

Mounting Arrangements

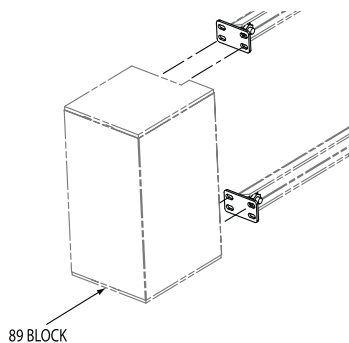

The connector mounting hole arrangement on the mounting bar has drilled and tapped holes to mount the R399 connector. The frame mounting side has a universal mounting slot to fit various distribution frames.
